Attn: Judge Drain
Ref: Delphi Corp. case #
05-44481
filed Oct. 5, 2005
Document #14705 to cancel OPEB (Health care and Insurance benefits)
for all retirees

Judge Drain:

I would like to object to the recent filing by Delphi to eliminate retirement health care benefits and insurance benefits.

As a former high level executive of Delphi (as well as my husband who is also a former high level executive of Delphi) while I understand the need of the company to improve its balance sheet and cash flow to acquire financing for an exit from bankruptcy, I am concerned about the manner in which this is occurring. Delphi has encouraged, and most recently, almost forced early retirement on many salaried employees while never mentioning the potential loss of health care in retirement, I am certain that this was contemplated and, in fact, a determined strategy prior to the recent round of significant retirements from the company. In fact, many of these recent retirees will receive only three months of health care coverage if the filing is approved.

If the U.S. entity of Delphi is truly in need of this draconian measure; and I believe it is, then why is this U.S. entity continued to be allowed to transfer assets (tools and equipment) and sales to over seas entities which in turn generate sales and profits on products which are then shipped back to the United States market. Perhaps you and the court, as well as the creditors, are unaware of these actions but it is a fact and I believe this is improper. It is time for the court to look at Delphi as one entity and determine the value remaining as it relates to all stakeholders.

It is apparent that management has chosen to strengthen its exit capabilities at the primary expense of its most vulnerable and unrepresented (non-union) class of creditors, U.S. salaried retirees, while continuing to enhance and remain constant in its commitment to overseas employees and businesses. Delphi has continued to hire and promote overseas executives, give pay increase to overseas executives and provide "bonus" money for these entities- all at the expense of the U.S. entity and its US employees and retirees. I, and many others, would be pleased to provide information and testimony related to the above.

I hope you will consider the welfare of the US salaried retirees when you make this decision which has a significant life effect on over 15,000 families.

Thank You
